

Make your mark.

Innovation.
Empowerment.
Advocacy.

As a BIO member, you'll gain
a powerful voice to help
advance your science and
enact meaningful change.

Where
breakthroughs
begin

Get connected. Drive innovation. Empower progress.

A BIO membership means you're part of a movement. A movement to support science and drive it forward in the face of skepticism, stifling regulations, and threats to IP. Remove barriers to innovation. Form vital partnerships. Overcome hurdles and reach that next big breakthrough.

As the world's largest biotech advocacy association, we have the resources, the connections, and the expertise to help every member of your company thrive as you transform lives.

Join us as we make the impossible, possible.

We're all
in this
together.

**No matter where you are in the biotech ecosystem,
we'll make sure your voice is heard.**

When you're striving to make your mark on the industry with that next breakthrough, BIO has your back. We advocate for the policies that matter to you, and we'll voice your concerns to the people who need to hear it.

Plus, as a BIO member, you'll have a place on policy committees, where you can speak up about issues that affect your company.

"Even if your company is small, get your key staff involved in committees. BIO is great at creating excellent opportunities."

DOUG DOERFLER

President & CEO, MaxCyte, Inc.

When it comes to biotech's future, we go right to the top.

Tackling biotech's biggest challenges requires a powerful, unified voice that can reach the right ears in the halls of governments around the world. BIO makes sure policymakers understand how biotech really works and the economic contribution it provides. We actively promote the creation of programs that fuel growth and the long-term health of our industry.

BIO puts the industry's needs front and center by:

- Protecting patient access to innovative biologic therapies and vaccines in government-administered health programs, including Medicare, Medicaid, and the 340B Prescription Drug Discount Program
- Advocating for federal and state proposals that create market-based solutions that provide patient access to new therapies in both the private and public health insurance markets
- Protecting against federal and state legislative proposals that would encumber acceptance and utilization of biotechnology-based innovations to improve agricultural and environmental sustainability and nutrition
- Advocating for federal and state programs that incentivize investment and foster continued growth and sustainability of a bio-based economy
- Advancing priority areas identified by Science & Regulatory Affairs, Policy & Research, Infectious Disease, Capital Formation, and Agriculture & Environment policy committees
- Serving as a trusted source of information to federal and state policymakers on the uniquely different, yet interconnected, components of the biotechnology ecosystem

We make sure
patient voices
are **heard**.

"As a trusted and effective voice for pro-innovation, pro-patient policies in Washington, D.C., and state capitals, BIO is second to none."

TODD BLEDSOE

Executive Director of Patient Engagement and Advocacy, Neurocrine Biosciences, Inc.

Human Health

BIO amplifies your voice so you can transcend obstacles to innovation. We help shape policy to clear the way by:

- Connecting BIO members with patient advocates to discuss policy issues, share best practices, network, and collaborate
- Developing and implementing strategic responses to scientific and regulatory initiatives from the FDA, NIH, and others
- Incentivizing new cures and advancing legislation that supports bringing these to market
- Advocating for policies that support the discovery and development of the medical countermeasures necessary for health security
- Protecting the biopharmaceutical innovation ecosystem from harmful policies that will hurt patients
- Prioritizing diversity, equity, and inclusion in clinical trials and drug development

Capital Formation

BIO is deeply committed to advocating for early-stage companies. We do everything in our power to help bolster growth by fighting for policies at the federal and state levels, including:

- Expanding access to capital for early-stage biotech companies
- Conducting industry analytics of actual and potential effects of market and regulatory changes on the industry
- Advocating for relief to emerging growth companies through:
 - Expansion of current 404(b) reporting relief
 - Safe harbor from current Section 382 NOL limitations
 - Payroll tax credit refundability
- Enhancing short selling transparency and 13(f) disclosures
- Increasing liquidity for private securities and in the small cap space
- Catalyzing BIO's network of state bioscience associations to drive economic development

Agriculture & Environment

As fears around the climate crisis and mistrust of agricultural biotech grow, we advocate for you to build trust and promote a more sustainable future. At BIO, we:

- Champion broad access to and support for agricultural and environmental biotechnology innovations focused on increasing resiliency and sustainability
- Highlight the need for functional, risk-proportionate regulatory systems and promoting transparency measures that grow trust in the innovation ecosystem
- Promote the bio-based economy across economic sectors

Global Markets & Trade

In an increasingly interconnected world, opportunities are everywhere, and so are challenges. BIO makes sure industry needs are part of the conversation by:

- Working closely with the administration to ensure our industry's objectives are a key part of U.S. trade policies
- Encouraging the adoption of national laws and regulations to foster cross-border collaboration and support the development of the biotechnology sector
- Offering you access to the resources, expertise, and contacts you'll need to enter the global market
- Supporting WHO pandemic response, plugging into global dialogues surrounding preparedness and response
- Providing opportunities to represent BIO in a number of international bodies and their meetings

Get even more from your membership.

A BIO membership comes with added benefits that can help you make your mark in biotech and take your company to the next level. Plus, when you become a member, all of your company's employees can take advantage of the same benefits!

Spend less, grow more.

More savings. More research.

Exclusive access. Deep discounts. BIO Business Solutions® (BBS) is the largest cost-saving program for the life sciences. You'll enjoy significant savings on industry-tailored products and services from 18 leading suppliers to help you minimize costs and maximize growth. Plus, when you purchase through BBS, you not only save money, you also help support BIO's important advocacy work.

"When we were a small company, it was important to stretch our dollars. Now, as a large company, BIO's cost-saving program is an even more important solution for us. We save over \$1 million each year."

WILLIAM NEWELL

CEO, Sutro Biopharma

BIO Business Solutions User Since 2004

Take biotech and your business to the **next level.**

Discover important industry trends. Identify crucial investment opportunities. Establish valuable professional partnerships.

As the world's largest biotechnology advocacy organization, BIO offers a broad array of exciting events across the globe.

BIO's legendary events are can't-miss business opportunities. By connecting you with industry veterans and top investors from across the biotech landscape, you'll meet face-to-face with leaders who can help your company grow.

BIO members always enjoy the deepest discounts on event registration at premium events such as:

BIO International Convention

Join industry leaders at the world's ultimate biotech event. You'll be in the company of thousands of attendees from every corner of the globe for four exciting days of networking, programming, and partnering.

The BIO International Convention is just one of the renowned events that you'll get the most from as a BIO member. **To view the full event calendar or to learn more about our global portfolio of partnering, education, and investor events, visit bio.org/events.**

BIO events offer a wealth of advantages, including:

- Uniting and empowering innovators and the biotech ecosystem to improve lives
- Facilitating collaboration with global thought leaders to bolster growth
- Serving as an unbiased venue to seek investment and business development opportunities
- Supporting the industry by creating a forum for sharing vital information

An education in **success**

Enjoy discounted rates on an exclusive online network of education alliance partners and propel your company forward.

Get the inside scoop.

BIO offers three wonderful free resources to keep you up to date on all the happenings in our rapidly changing industry.

If it's happening in biotech, it's covered in depth at [Bio.news](#). From health to climate change to international topics, you'll find it here. Enjoy news, podcasts, editorial pieces, and much more.

You can also subscribe to [Good Day BIO](#), a daily online newsletter that provides you with the latest critical industry talking points in less than a 5-minute read. It's the only daily newsletter from the intersection of biotech, politics, and policy.

Want to get inspired? The [I am BIO](#) podcast is the place to go to hear powerful stories of biotechnology breakthroughs, the people they help, and the global problems they solve.

A space to call your own

The BIO Member Lounge is a dedicated space in our D.C. office reserved just for members. You can use it however you like, whether it's to hold meetings, work, or simply unwind from an active Capitol Hill schedule. This lovely space is just another of the many perks of being a BIO member.

A chance to tell your story

As skepticism and cynicism around science grow, building public trust is vital. We'll help you create a video that gives an in-depth look at your company and how it changes lives. By sharing your video with the public, we can help put a human face on biotech.
